

## TD-17 V-DRUMS SERIES

- Sound engine developed from **flagship** TD-50 series
- **Stream audio** to the TD-17 from smartphones via Bluetooth
- **Sample import** with **layering** capability
- **Coach** and **song player** functions to improve timing
- **New snare, hi-hat** and **kick pads** for greatest playing experience
- Legendary Roland V-Drums **quality** and **durability**

## WHAT MAKES TD-17 UNIQUE?

- Exceptional pads and triggering for **unrivalled playing feel**
- Uncompromised **sound, dynamics and customization**
- Instant **connectivity with music** for immediate enjoyment

## EXCEPTIONAL PADS & TRIGGERING FOR UNRIVALLED PLAYING FEEL

- **Captures every nuance of drumming skill & style**
- **Sensing that captures every stick hit in high detail**

## GET THAT PERFECT DRUMMING FEEL

Newly developed pads for TD-17

**PDX-12**

Larger 12" snare pad, tension adjustable 2-ply mesh head for realistic feel

**VH-10**

Hi-hat with natural swinging motion

**KD-10**

Kick pad with increased stability and great pedal feel

## UNCOMPROMISED SOUND, DYNAMICS & CUSTOMISATION

- Play **complex & organic dynamics** with sounds developed from TD-50
- Every stick hit **instantly** delivers true-to-acoustic **tonal changes & expression**
- Edit sounds to create the **perfect drum sound**

## SAMPLE IMPORT

- Import WAV samples
- Assign to **any** pad
- Play individually or **layer** with internal sounds

## INSTANT CONNECTIVITY FOR IMMEDIATE ENJOYMENT

- **Stream audio** from smart device **direct** to TD-17 module
- **Play along** with favourite content
- Smartphone **shelf** on module

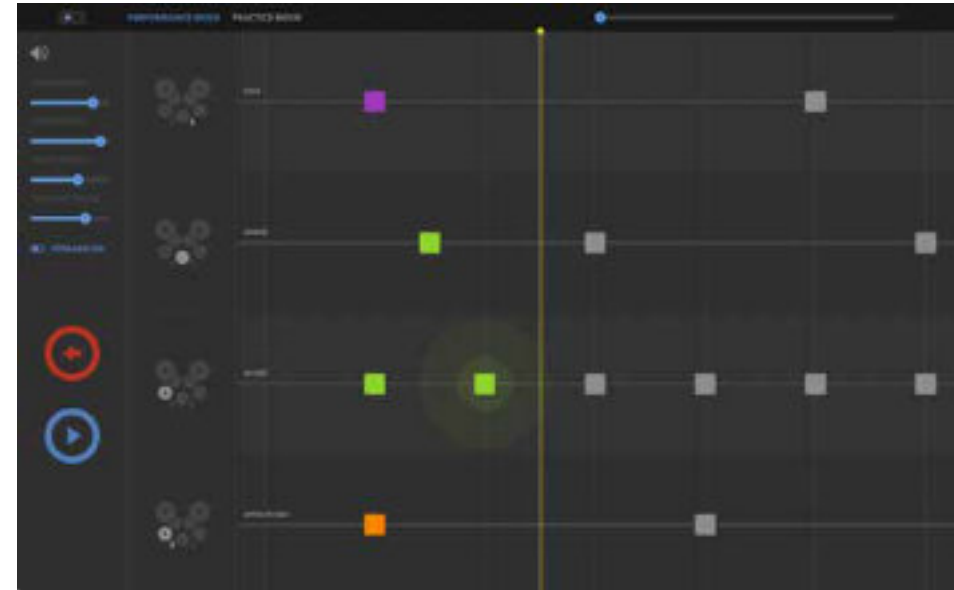

## EASY DIGITAL RECORDING

- **Connect direct to your Mac/PC via USB MIDI and mix on your DAW**

## TOOLS TO IMPROVE DRUMMING, FAST

- Stay motivated with **built-in coach** function
- **Record** and **replay** drumming performances, even with songs
- **FREE Melodics** software

# WHAT MAKES ROLAND V-DRUMS LEGENDARY?

## Sound Engine

Sampling of acoustic drums, realistic sound, modelling technology such as COSM, SuperNATURAL and PRISMATIC for true-to-life behavioral reaction, sound creation and lightning fast response to every hit.

## Interface

The original and best dual-ply tension-adjustable mesh head, cymbals with natural swinging motion, hi-hats mounted to an acoustic hi-hat stand, kick pads with natural rebound, the three-ply mesh head and aluminium shell of the PD-140DS snare drum – all Roland firsts.

## Sensing

Accurate and reliable detection of every stick hit which is sent to the sound engine to provide real-world behavioral reaction.

Digital multi-sensing ride and snare pads, dual-zone mesh pads, 3-zone cymbals which make V-Drums play just like their acoustic counterparts.

## Durability

Clamps which grip and stay put, materials that stand up to relentless pummeling. Roland V-Drums are hit repeatedly with sticks, at force, hour after hour, day after day, for years.

The legendary durability speaks for itself, with kits from over 20 years ago still being played today.

## Musicality

Music is the motivating force behind every drummer. Drumming by itself is fun – but when drumming is connected with music it becomes addictive.

Bluetooth audio, coach functions, recording and playback, Melodics – we recognise that connectivity with music multiplies the player's inspiration and enjoyment.
